- Size of the cold branch pipe, or both the hot and cold branch pipes.
 - Appliances, appurtenances, or fixtures not referenced in this table shall be permitted to be sized by reference to fixtures having a similar flow rate and frequency of use.
 - The listed fixture unit values represent their load on the cold water building supply. The separate cold water and hot water fixture unit value for fixtures having both hot and cold water connections shall be permitted to be each taken as three-quarter of the listed total value of the fixture.
 - The listed minimum supply branch pipe sizes for individual fixtures are the nominal (I.D.) pipe size.

 - Assembly (Public Use) (See Table 422.1B).
 - Where sizing flowmeter systems, see Section 610.10.
 - Reduced fixture unit loading for additional hose bibbs is to be used where sizing total building demand and for pipe sizing where more than one hose bibb is supplied by a segment of water distribution pipe. The fixture branch to each hose bibb shall be sized on the basis of 2.5 fixture units.
 - For water supply fixture unit values related to lots within mobilehome parks in all parts of the State of California, see *California Code of Regulations, Title 25, Division 1, Chapter 2, Article 5, Section 1278*. NOTES

- ASSUMPTION: WATER AND SEWER FACILITIES ARE CONNECTED TO EXISTING ON-SITE SERVICE; THEY WILL NOT BE A SEPARATE SERVICE OR SEPARATE MAIN METER.
- CONNECTION TO CITY MAINS IN THE STREET WILL REQUIRE AN ENCROACHMENT PERMIT FROM THE PUBLIC WORKS DEPARTMENT.
- MINIMUM WATER SERVICE WILL BE 1" AND MINIMUM SEWER SERVICE WILL BE 4"
- NOTE: FOR BOTH SERVICES, IF THEY ARE EXISTING AND DO NOT MEET THE MINIMUM 4" SEWER/1" WATER CITY REQUIREMENTS, THE ADU APPLICATION WILL TRIGGER A REQUIREMENT TO BRING THE SERVICE UP TO CURRENT STANDARDS.
- SEE SITE PLAN FOR CONNECTION TO WATER AND SEWER SERVICE.

Notes:

- Size of the cold branch pipe, or both the hot and cold branch pipes.
- Appliances, appurtenances, or fixtures not referenced in this table shall be permitted to be sized by reference to fixtures having a similar flow rate and frequency of use.
- The listed fixture unit values represent their load on the cold water building supply. The separate cold water and hot water fixture unit value for fixtures having both hot and cold water connections shall be permitted to be each taken as three-quarter of the listed total value of the fixture.
- The listed minimum supply branch pipe sizes for individual fixtures are the nominal (D.I.) pipe size.
- For fixtures or supply connections likely to impose continuous flow demands, determine the required flow in gallons per minute (gpm) (L/s), and add it separately to the demand in gpm (L/s) for the distribution system or portions thereof.
- Assembly (Public Use (See Table 422.1)).
- Where sizing flushometer systems, see Section 610.10.
- Reduced fixture unit loading for additional hose bibbs is to be used where sizing total building demand and for pipe sizing where more than one hose bibb is supplied by a segment of water distribution pipe. The fixture branch to each hose bibb shall be sized on the basis of 2.5 fixture units.
- For water supply fixture unit values related to lots within mobilehome parks in all parts of the State of California, see California Code of Regulations, Title 25, Division 1, Chapter 2, Article 5, Section 1278. For water supply fixture unit values related to lots within special occupancy parks in all parts of the State of California, see California Code of Regulations, Title 25, Division 1, Chapter 2.2, Article 5, Section 2278.

- WHEN DIRECTED BY THE DIRECTOR OF PUBLIC WORKS OR AS SHOWN ON THE PLANS, THE LATERAL SHALL BE LOWER WHERE NECESSARY TO SERVE EXISTING PLUMBING OR LOW LOTS.
- IF MAIN AND LATERAL ARE DISSIMILAR MATERIAL CUT OFF BELL ON BRANCH SIDE OF MAINLINE WYE AND INSTALL A MISSION, FERNCO, OR EQUAL FLEXIBLE RUBBER COUPLING WITH STAINLESS STEEL SHEAR BAND.
- THE CENTER OF CLEANOUT SHALL BE LOCATED 1' TO 3' BEHIND FACE OF CURB WHERE THE SIDEWALK IS NOT ATTACHED TO THE CURB.
- THE RISER SHALL BE THE SAME MATERIAL AS THE SERVICE LATERAL. SEE SEWER CLEAN OUT STANDARD DRAWING 6-06.
